

## Meet Sara Morgan

Sara Morgan knows just what it is like to have a good job that is just not the “right” job. As a software developer, she has worked for large and small companies spanning multiple industries, including Health Care, Finance, Retail, Government, Robotics, and Information Technology. None of these jobs ever provided Sara with the fulfilling life she was searching for and in 2005 she made the jump to self-employment with the start-up of her own consulting company, Custom Solutions, LLC (<http://www.custsolutions.net>).

Sara struggled at first to find her footing, but eventually hit her stride and is now very happy and able to provide for herself and her children in a satisfying way. She strives to help others cut their own path in life and work. In the fall of 2009, her latest book, ***No Limits: How I Escaped the Clutches of Corporate America to Live the Self-Employed Life of My Dreams*** was published. Sara also hosts an interactive social web site dedicated to helping other people achieve their dreams (<http://nolimitsthebook.ning.com>).

Sara is a Microsoft certified web developer with over 15 years of experience developing web sites accessed within a Corporate Intranet and those available to the public through the Internet. She has published six technical books, along with dozens of online and printed articles and is a recognized expert in the field of web development. In March of 2007 she was awarded the prestigious Microsoft Most Valued Professional (MVP) award for her work with Microsoft Speech Server and Office Communications Server.

Sara has always had a keen interest in Artificial Intelligence and Robotics and in 2005 her first book, *Building Intelligent .NET Applications* was published by Addison/Wesley. Her long term plans involve using proceeds from the *No Limits* book to fund a project aimed at providing intelligent robotic assistance for the elderly.
